### SUEZ CANAL ZONE IS MADE BARRIER AGAINST INVASION

ISMAILIA, Egypt, Oct. 7.—None of he theaters of war furnishes more insresting features than the zone along he Suez canal, where the British have at up a barrier against invasion of his most important territory by the Turks. Official communiques have iven but small idea of the wonderul military organization which has een built up here in the desert. When Lieutenant-General Sir Archield Murray last January assumed harge as commander-in-chief of the british forces in Egypt they were occasional singular and slow-moving camels of the times the water is carried to the outposts by camels. All told the pipe lines now completed total over a hundred miles.

In the times the water is carried to the pipe lines now completed total over a hundred miles.

In the territory between the outposts and the canal there are many well-laid camps for thousands of troops. Everywhere there is intense the water is carried to the outposts by camels. All told the pipe lines now completed total over a hundred miles.

In the territory between the outposts and the canal there are many well-laid camps for thousands of troops. Everywhere there is in tense the water is carried to the outposts and the canal there are many well-laid camps for thousands of troops. Everywhere there is intense but methodical activity.

Next Buildings.

Neatly built wooden and steel buildings are located where only the Bedout the canal there are many well-laid camps for thousands of troops. Everywhere there is intense to outpost the canal there are many well-laid camps for thousands of troops. Everywhere there is intense to outpost and the canal there are many well-laid camps for thousands of troops. The canal there are many well-laid camps for thousands of troops. Everywhere there is canal there are many well-laid camps for thousands of troops. Everywhere there is canal there are many well-laid camps for thousands of troops. Everywhere the every where the canal there are many well-laid camps for thousands of troops. Everywhere the canal there are many well-laid camps

harge as commander-in-chief of the tritish forces in Egypt they were occupying positions along the canal itelf. Virtually the only avenue of aproach for the Turks was across the andy wastes of the northern half of he peninsula, the lower part being countainous and impracticable for countainous and impracticable for covernment of troops. Up to this time

General Murray's policy was vindi-ated early last month when an army 114,000 Turks did succeed in cross-ing the desert, engaging the British Romani, where they met with dis-strous defeat. Had this fight been aged on the banks of the canal, even ith the same results, shipping neces-

In the organization of his defences a the canal zone, General Murray as made use of the training he had arly in the war in France, when, as hief of the general staff, under Gen-ral French, he played a leading role in the skilful British retreat from

fons.

An opportunity to study the organiation and see every feature of the deceases of the canal was given to a epresentative of the Associated Press, ust transferred from the British from a France to the blistering heat and hifting sands of the Sinai desert.

Constructive Warfare.

General Murray is waging what hight be called "constructive warfare." n order to establish and maintin his roops in the desert it has been neces-

pops in the desert it has been necesary to construct highways and rail-ary, to construct highways and rail-rays, many miles of which will be of nestimable value to Egypt after the rar, for wherever possible he is build-ag with the idea of permanency. For xample, within a comparatively short ime, should the operations continue, Port Said, Ismailia and Carlo will be me, should the operations continue, out Said, Ismailia and Cairo will be "Who can tell what the future may "Who can tell what the future may nked by a rock-ballasted highway hich would do credit to any country. Il told, the commander has built deleted by censor) miles of highway nd railroad, and the work is being ushed steadily forward in many

een used, excepting that there are aw dugouts. The soldiers live main-y under canvas or in wooden build-ngs. Beyond these, extending the en-

It lies a fine the canal, is an almost the canal and its an almost the canal and its an almost the canal and an almost the can The linking of these desert outposts with the canal had to be done simulaneously with their establishment. Most of the garrisons have been located in tractiess waterless wastes which, and roads not been built, could have been provisioned only by the employment of myriads of slowly moving cambia.

General Murray, however, has built many short lines of railway and high-ways which jut out from the canal at right angles toward the fighting line. These do not extend the entire disbe necessities at railheads not far cack, and from the termini supplies are moved by camels.

U. D. UILINULDU

Twas Vastly Different

The gauges of the largest wells for the twenty-four hours ending at 7 o'clock yesterday morning were as follows: Hickman and Huffman's No. 3 Alfred Kendall, 505 barrels; Delmare Oil Company pears to be no disposition on the part of General Murray to interfere with the customs and pursuits of the people except where necessary for the welfare of the military operations. However, he is a stern disciplinarian and one thing that he has devoted much attention to has been the stamping out of various forms of vice which flourish in Expyt. As a result, it is said, that the moral tone of the whole country has been raised to a higher level. Many tributes of respect for General Murray's work are heard.

General Murray's work are heard.

General Murray insists on personal supervision of all his work. There is no part of the canal zone that he spends days at a time inspecting the operations. He has his finger on every detail and he is quick in decision on all questions.

His plans for the remainder of his campaign are a matter of much speculation, however. Officers and men often look off into the desert and ask on another if the commander uiltimately will lead them out to battle with the Turks and reclaim this territory. But when the subject is broached the general merely smilles to say:

Who can tell what the future may develop?"
